

AMENDMENTS TO THE CLAIMS:

Please amend claims 7, 14, and 18 as follows.

1 – 6. (Canceled)

7. (Currently Amended) An apparatus comprising:

a rack-mount server enclosure having a front face with a partial recess; and~~and~~

a display device mounted within the recess

~~a display device having a ball and socket joint to movably coupled to a back of the~~

~~display device within the enclosure for multiple degrees of freedom of movement for the~~
display device.

8. (Currently Amended) The apparatus of claim 7, wherein ~~the ball and socket joint~~the
movable coupling is indexed to allow incremental adjustment of the coupled display device.

9. (Previously Presented) The apparatus of claim 7 wherein the display device comprises an
LCD.

10 – 12. (Canceled)

13. (Previously Presented) The apparatus of claim 7 further comprising a securing
mechanism to lock the display device at a position.

14. (Currently Amended) A rack mount appliance, comprising:
A front face with a partial recess; and
~~a ball and socket joint coupled within the rack mount appliance; and~~
a display device, having a back end movably attached to ~~the ball and socket joint~~ the
enclosure, to partially embed the back end of the display device within the rack mount appliance
and enable multiple degrees of freedom of movement of the display device.

15 – 16. (Canceled)

17. (Currently Amended) The rack mount appliance of claim 14 wherein the ~~ball and socket joint~~
movable coupling has a securing mechanism to lock a display position of the display device.

18. (Currently Amended) A rack mount server having an integrated display device wherein
an end of the display device is coupled within a recess in the rack mount server enclosure via a
~~ball and socket joint~~movable coupling, to provide multiple degrees of freedom of movement for
the display device.

19. (Currently Amended) The rack mount appliance of claim 14, wherein the display device
may be viewed at multiple angles with adjustment of the display device via ~~the ball and socket joint~~
a movable coupling.

20. (Currently Amended) The rack mount appliance of claim 14 wherein the ~~ball and socket joint~~
movable coupling is indexed to allow incremental adjustment of the display device.

21. (Previously Presented) The rack mount appliance of claim 14 wherein the display device comprises an LCD.

22. (Previously Presented) The rack mount server of claim 18 further comprising a securing mechanism to lock the display device at a position.

23. (Currently Amended) The rack mount server of claim 18 wherein the ~~ball and socket joint~~ movable coupling is indexed to allow incremental adjustment of the display device.

24. (Previously Presented) The rack mount server of claim 18 wherein the display device comprises an LCD.

25. (New) The apparatus of claim 7 wherein the movable coupling is a ball and socket joint.

26. (New) The rack mount appliance of claim 14 wherein the movable coupling is a ball and socket joint.

27. (New) The rack mount server of claim 18 wherein the movable coupling is a ball and socket joint.
